

DEEPANSHU

Java Backend Developer · Spring Boot · Microservices · AWS · AI

+91-7217540175 · deepanshujangid97@gmail.com · Delhi, India

PROFESSIONAL SUMMARY

Java Backend Developer with 3+ years of experience designing and scaling RESTful Microservices using Spring Boot, Hibernate, Kafka, MySQL, and AWS for high-availability financial and government platforms serving 1B+ users. Delivered 30% database performance improvement, 20% reduction in incident recurrence, and 50% improvement in code quality through SonarQube, CI/CD pipelines, code reviews, and zero-downtime blue-green deployments.

TECHNICAL SKILLS

Languages: Java 17+, Python, SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring AI, Hibernate (ORM)

Cloud & DevOps: AWS (EC2, RDS, S3, API Gateway), Maven, Apache Tomcat, CI/CD Pipelines

Databases: MySQL, PostgreSQL — query optimization, indexing, caching

Tools: Git, Postman, JIRA, Eclipse, SonarQube, Grafana, AI

Concepts: Microservices Architecture, RESTful APIs, OOPs, SOLID Principles, OAuth 2.0, System Design (HLD & LLD)

PROFESSIONAL EXPERIENCE

Senior Executive — Backend Engineer | **Softenger India Pvt. Ltd.**

Jan 2026 – Present

► **Project: UIDAI - AADHAAR (Government of India)**

- Lead incident management and root cause analysis (RCA) for high-priority issues across Java/Spring Boot microservices, achieving 100% SLA adherence and zero escalations in a zero-tolerance government IT environment.
- Develop and support critical Java-based backend infrastructure for UIDAI (Aadhaar), maintaining 99.9% uptime for RESTful services used by 1B+ citizens nationwide.
- Monitor real-time application and API performance via Grafana dashboards across MySQL and Kafka-based microservices, proactively identifying degradation and ensuring SLA compliance before user impact.
- Collaborate with network, security, and application teams to debug, optimize, and deploy backend services across a large-scale, mission-critical Java microservices architecture.

System Engineer — Java Backend Developer | **Tata Consultancy Services (TCS)**

Apr 2024 – Oct 2025

► **Project: NSE – National Stock Exchange**

- Architected and delivered **high-throughput Microservices** using Java, Spring Boot, and RESTful APIs on one of India's largest stock exchange platforms — supporting 100% real-time trading operations.
- Owned end-to-end feature delivery: requirement analysis → system design → schema design → API development → cloud deployment — reducing handoff delays by ensuring single-point accountability.
- Migrated Spring Boot applications to AWS Cloud** (EC2, S3, RDS, API Gateway), optimizing performance and cutting operational overhead through managed cloud services.
- Boosted MySQL database performance by 30%** via advanced query optimization, strategic indexing, table partitioning, and caching — directly reducing query latency on high-volume financial data.
- Participated in Agile sprints — sprint planning, daily standups, and code reviews — consistently delivering features on schedule with zero critical defect escapes.

► **Project: IndiaFirst Life Insurance**

- Built and maintained a **high-availability policy management system** serving 1M+ customers with continuous uptime and fully secure transaction processing.
- Executed **100+ SQL queries weekly** for policy corrections, premium reconciliation, and regulatory report generation — achieving zero data loss and full audit compliance.

- Led root cause analysis (RCA) for critical production incidents; implemented process improvements that **reduced repeat incidents by 20%** and improved system reliability.

Junior Java Developer | [AlmaBetter](#)

Aug 2023 – Mar 2024

► **Project: ContactMate — Cloud-Based Contact Management System**

- Designed and built a **production-deployed, cloud-based Contact Management System** using Java, Spring Boot, MySQL, Hibernate, Spring Security, and Microservices architecture.
- Implemented **OAuth 2.0 authentication, BCrypt encryption**, and Spring Mail email verification — delivering end-to-end secure user onboarding and data protection.
- Designed **generic, reusable APIs** that reduced development redundancy and improved API response time by **40%**; used SonarQube to achieve a **50% improvement in code quality** scores.

EDUCATION

Master of Computer Applications (MCA)

Oct 2021 – Jul 2023

KIET Group of Institutions, Ghaziabad, UP

Bachelor of Computer Applications (BCA)

Aug 2017 – Sep 2020

Institute of Technology and Science, Ghaziabad, UP

CERTIFICATIONS

- Full Stack Java Development (Java, Spring Boot, JavaScript, React) – Udemy
- Oracle SQL Certificate Course – Udemy
- Java Spring Boot Apps Deployment to Azure – Udemy
- Git and GitHub – Udemy
